DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-8, and 35 are rejected under 35 U.S.C. 102 (e) as being anticipated by Jensen et al. (US 20040147268A1).

Regarding claims 1, 2, 5, and 8, Jensen et al. directs to a position location for WAP mobile entity comprising: generating an invocation response, said invocation response containing a location invocation document including at least an instruction directed to said networked entity to transmit location information being provided for performing location-based services being operated on a serving entity (Jensen et al., abstract; page 1, paragraph 0005 and 0006); binding said invocation response to a communication protocol defining a header section and a body section; said location invocation document being comprised in said body section (Jensen et al., paragraph 0040 and 0041), and transmitting said invocation response to said networked entity (Jensen et al., paragraph 0006).

As to claims 3 and 6, Jensen et al. further discloses that location invocation document is encoded as an XML-based (Jensen et al., paragraph 0038).

As to claims 4 and 7, Jensen et al. further discloses communication protocol is a wireless application protocol (WAP) (Jensen et al., paragraph 0038).

Response to Arguments

In response to the applicant's remarks dated on 11/7/06, claim 35 is now examined as well as claims 1-8 since claim 35 is a linking claim. The restriction to claim 21 cannot be withdrawn since claim 21, drawn to a computer product, which is not a linking claim. This program product can be used in a materially different process of using that product. See MPEP § 806.05(h). Claims 29-34 are not directed to a computer program product, however they are belong to the non-elected group. Therefore, the status of withdrawing of claim 29-34 is still the same.

The reference to Jensen is still proper since it still reads on the limitations of the claims 1-8, and claim 35. This rejection is made non-final rejection to include the rejection of claim 35.
